

Wheel of Health Clinical Profile

Simon Weech

Director | Registered Nurse / Advanced Clinical Practitioner

Role	Director
Profession	Registered Nurse / Advanced Clinical Practitioner
Professional registration	NMC registered nurse and independent prescriber
Region	Hampshire / Portsmouth
Specialist focus	Digital leadership, advanced clinical practice, governance and healthcare systems

Professional profile

Simon Weech is a Director of Wheel of Health Limited, supporting the organisation's strategic development, digital transformation, operational systems and governance infrastructure. He brings senior NHS experience as a Trust Lead for Advanced Practice and Senior Advanced Clinical Practitioner in Acute Internal Medicine, with a professional background in workforce development, education, clinical governance, digital innovation and advanced clinical practice. Alongside his clinical and strategic NHS roles, Simon contributed to regional advanced practice development through NHS England South East, where he worked as an Advanced Practice Training Programme Lead and as part of the Regional Faculty for Advancing Practice. This included supporting implementation of national advanced practice policy, supervision models, professional recognition routes and workforce development across organisational and professional boundaries. Within Wheel of Health, Simon's contribution is non-clinical in relation to posture management and equipment provision. His focus is on digital infrastructure, business systems, governance, strategic planning, operational resilience and supporting the organisation to develop as a clinically credible, well-governed and future-focused specialist service.

Specialist clinical expertise

- Digital systems and information technology infrastructure
- Advanced clinical practice leadership and workforce development
- Regional advanced practice education, supervision and policy implementation
- Governance, assurance and documentation systems
- Clinical education and professional development
- Healthcare service improvement and digital transformation
- Stakeholder communication and strategic planning

Contribution to Wheel of Health

Simon supports Wheel of Health's development as a modern, digitally enabled and clinically governed organisation. His role focuses on strengthening the systems around the clinical service, including website development, digital tools, data processes, operational workflows, governance documentation, strategic planning and business development. His NHS England and Trust Lead experience provides a strong understanding of healthcare governance, workforce development, professional assurance and the importance of clear standards. This helps Wheel of Health present itself as a mature specialist provider, with the infrastructure needed to support high-quality clinical work, consistent documentation, transparent processes and sustainable growth. Simon does not make clinical decisions in relation to Wheel of Health client assessments, equipment recommendations or professional clinical input. His contribution is focused on the strategic, digital and operational systems that support the clinical team to deliver safe, person-centred and high-quality services.
